Genes and Grace: Theology and Genetic Engineering

Dr Brent Waters
(Associate Professor of Christian Social Ethics
Garrett-Evangelical Theological Seminary, USA)

Abstract: The notion of engineering our grace, particularly through offspring, is an old idea that keeps re-emerging in different guises. The purpose of this lecture is to examine some illustrative manifestations of this old idea, especially in light of the development of new genetic technologies, and then ponder if we are witnessing the emergence of a renewed heresy and if so what this may portend for the future.
